

I am a Long Haul Trucker and I rely on my XM Radio for local weather and traffic information. Being able to find out the weather kept me from getting caught by a Tornado at Boise City OK just a couple of days ago. That is not the first time and I hope not the last time my XM Radio has saved me considerable greaf. I have also been able to find alternate routes and not get stopped for hours because of traffic tie-ups. Evidently you have NO IDEA how helpful our XM Radio is or you would be trying to help keep it on the air and going forward instead of trying to hinder it.
